CAREER OBJECTIVE

Enthusiastic and growth-oriented Educational Technology and Engineering student who has completed the 3rd Year last semester. Seeking opportunities to apply strong full-stack skills in React, Node.js, and modern databases to build scalable web applications and educational technology solutions.

EDUCATION

Bachelor of Science in Educational Technology and Engineering **Completed 3rd Year (Last Semester)**
University of Frontier Technology, Bangladesh

WORK EXPERIENCE

Communication Intern **Completed Internship**
Youth Skill Development Trust Institute

- Completed internship assisting in organizational communication, technical coordination, and skill development workshops.
- Collaborated with team members to enhance student outreach and event engagement.

PROJECTS

1. CareerBridge

- Built a full-stack platform connecting students and job seekers with mentorship and career opportunities.
- Implemented dynamic dashboard components and integrated secure backend services.

2. Coffee Shop Website

- Developed a responsive web application featuring interactive product menus, cart management, and seamless order workflows.

3. Music App Clone

- Developed a Spotify-inspired music application allowing users to organize songs lexicographically, create custom playlists by singer, and stream audio seamlessly.

4. Amazon Clone

- Designed an e-commerce platform allowing users to browse products, filter items, and simulate order placement.

5. Weather Checker App

- Built a weather tracking application retrieving real-time data on temperature, humidity, and rainfall forecasts.
